Software Proficiency

Web Design/Development	:	HTML, CSS, WordPress, PHP, JavaScript
Databases	:	Oracle, MySQL
Software's	:	Photoshop, Dreamweaver, MS Word Excel, PowerPoint, After Effects
		Programming Languages: C, C++, JAVA
Software Testing	:	Black Box Testing, White Box Testing, Unit Testing, Integration Testing

Interpersonal Skills

- Good Listener

- Trustworthy and ability to rapidly build rapport.

- Confident and determined.

- Ability to perform under pressure and cope up with different situations.

Overview of skills and experience acquired in Academic

1. Exploiting Web Query for Web People search (EWQ WePS)

This project was created to ease the process of information search and provide a 'one click' desktop based information search.

Project Summary:

- Searching for people on the Web is one of the most common query types to the web search engines today.
- The software tool makes searching for details of a person easier and faster.
- User needs to type only Name of the person. The software will search the whole Web for the result, cluster it and download it to your local Machine

I was part of 3 member team, I was assigned to

- Design and implement the frontend of the tool
- White Box testing: Test end to end functionality of the tool.

2. Electronic road pricing (ERP)

This project was created to build a sustainable model to reduce pressure on transport infrastructure
Project Summary:

- Aim was to automate the process of toll payment by using currently available technology, which can help in reduction of traffic.
- The model will enable automatic deduction of fees from passing travelers by using a chip cards. Every car has have a small chip card and an Interface Unit (IU) which is used for tracking

When a vehicle is equipped with a chip card under an ERP gantry, a road usage charge is deducted from the chip card. Sensors installed on the gantries communicate with the IU via a dedicated short-range communication system, and the deducted amount is displayed to the driver on an LCD screen of the IU.

I was part of 4 member team, I was assigned to

- Design and implement the frontend of the tool using VB and Back end Using MySQL
- Test the Information Flow between the two communicating Devices.

Personal Details

DOB   : 18th, March 1988**.**

Address   : C/510, Govardhan Nagar,
                    Opp. Poisar Gymkhana,
